

The image is a creative portfolio cover collage. It features a central white rectangular area with horizontal blue lines, set against a background of textured, light brown paper. At the top left, a large, irregular brown shape with a dark brown outline is partially visible. A dashed brown line with an arrow points from this shape towards the top of the white area. In the top right corner, there is a torn piece of brown paper with a white circular stain, secured by a silver paperclip. Below this, a small bouquet of dried orange flowers is attached with a piece of brown tape. The text 'Creative Portfolio' is written in a green, sans-serif font on a tilted, cream-colored rectangular piece of paper with a red grid pattern, which is held in place by a red paperclip. The name 'KHARISMA FAHRUN N' is written in a large, bold, brown, sans-serif font across the center of the white area. In the bottom left corner, there is a small bouquet of dried yellow flowers on a brown paper strip, which is placed on a torn piece of brown paper with a red grid pattern. Several small, yellow, star-shaped confetti pieces are scattered around this bottom-left element. In the bottom right corner, another large, irregular brown shape with a dark brown outline is visible.

ABOUT ME ^^

A proactive and enthusiastic 4th-semester Information Technology student with a strong interest in software development and cybersecurity. Possesses conceptual understanding and hands-on experience in Operating Systems, dataset analysis using Python, and database management with MySQL, seeking to apply these skills in a dynamic technology environment

ViSiON

To become an innovative technology professional with deep expertise in software development and cybersecurity, capable of creating secure, efficient, and impactful digital solutions for society

- continuously learn and master the latest technologies, especially within the Python, database, and cloud computing ecosystems
- seek practical experience through challenging projects and internship opportunities to apply academic knowledge
- actively contribute to the tech community and open-source projects to collaborate and share knowledge.

MiSSiON

EDUCATION

2019-2022

MA MADARIJUL HUDA

Graduated from the Natural Sciences program (MIPA), building a strong foundation in logic and analytical problem-solving

2019-2022

**PONDOK PESANTREN
NURUL ANWAR**

Developed discipline, character, and time management skills through religious education and boarding school life

2023-PRESENT

**INSTITUT TEKNOLOGI
SEPULUH NOPEMBER**

Pursuing a Bachelor's degree in Information Technology with a focus on software development and cybersecurity

WORK EXPERIENCE

2024 - NOW SECRETARY & TREASURER TPKI ITS

In a dual role as Secretary and Treasurer, I am responsible for the administrative and financial integrity of the organization. This position demands high accuracy, effective time management, and clear communication to coordinate activities and maintain stakeholder trust.

2025 - NOW ADMINISTRATIVE ASSISTANT

support the operational and strategic functions of the student representative body. This role requires strong organizational skills, attention to detail, and effective multi-stakeholder collaboration to ensure the smooth execution of programs and maintain compliance with university protocols.

PERSONAL SKILLS

LEADERSHIP &
COLLABORATION

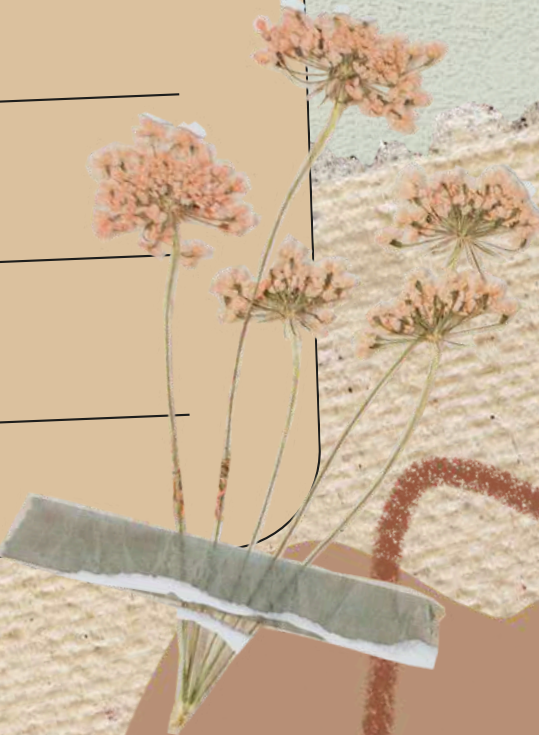

PROBLEM SOLVING &
ANALYTICAL THINKING

TIME MANAGEMENT &
DISCIPLINE

PROJECT PORTFOLIO

WARCOFFEE

Inspired by the efficiency of a digital food stall (angkringan) system, this project aims to develop "Warcoffee," a web-based ordering platform for a coffee shop. The objective is to create a responsive and user-friendly interface for customers, backed by a robust administrative system for easy management.

This project was built using a classic and powerful web development stack such as Bootstrap, PHP, and MySQL.

DUKUHSETI FARM

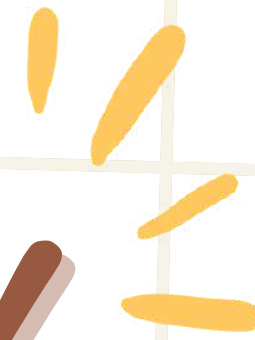

Dukuhseti Farm is a web-based sales information system designed to empower local lettuce farmers in the Dukuhseti region of Indonesia. The project aims to bridge the gap between traditional farming and the digital market by providing a simple, modern, and effective platform for farmers to showcase and sell their produce directly to consumers.

Thank You ^^
